On-Site Training

On-line or on the road... we take care of business.

The more you know about wheel-end technology, the greater your opportunity to cut wheel-end operating costs. That's why Webb is the industry leader for technical support and customer training.

We invest millions of dollars in R&D and manufacturing technology, and then we share what we learn with our customers by offering the best products and support in the industry. Our on-site field support team, training website, Mobile Apps (Apple, Android, and Blackberry Playbook platforms), training videos and printed materials help our customers cut and control maintenance costs.

Distribution at more than 5,000 locations ensures that the products you need are always nearby. Combine this with our ISO 9001 Registered Quality System, helpful customer service, dependable delivery and strong financial backing—and you've got a business partner you can count on today... and down the road.

Cut your maintenance costs today! Visit our training website, or scan the QR code on the bottom right to get certified. We'll send a token of our appreciation when you complete the course.

English Video | Spanish Video | French Video

Get Certified

View Part 1 (FN Mounting Systems), Part 2 (BSN Mounting Systems) and Part 3 (Consequences of Improper Installation) videos before taking certification test.

TRAINING VIDEOS (English/Spanish/French versions)

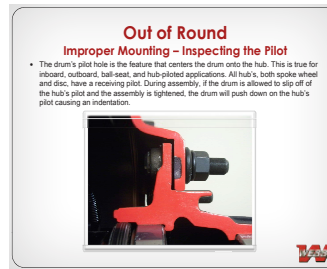

“Proper Brake Drum Selection” video helps you match the right solution to your application to help you control costs and operate at peak braking efficiency.

“FN Mounting Systems” video shows you the proper method to install a hub piloted (FN) brake drum.

“BSN Mounting Systems” video shows you the proper method to install a stud piloted (BSN) brake drum.

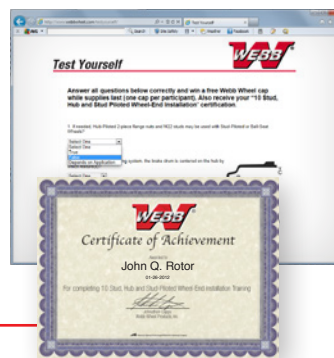

“Consequences of Improper Installation” video shows you the importance of proper installation and the consequences of improper installation.

You can also find these videos on YouTube; and if on-line videos are inconvenient, we will provide copies for you.

TRAINING DOCUMENTS. “Common Brake Drum Warranty Returns” covers the most common warranty claims for brake drums: “Out-of-Round” and “Cracked”. This pdf document describes how and why these conditions occur and offers insight on how to cut maintenance costs by preventing brake drum damage.

Photos and descriptions in the “Guidelines for Brake Drum Replacement” document help you understand when to replace worn brake drums.

GET CERTIFIED. Take online tests after viewing the videos and pdf training materials to get certified in “Proper Brake Drum Selection” and “Proper Brake Drum Installation”. Upon successful completion you will receive a certificate from Webb.

You can access the website videos, training documents, certification process, and the expansive part number interchange without a login.

Downloadable PDF Files

Common Warranty Claims Issues

This document addresses the potential causes of the two most common warranty returns for brake drums: “out-of-round” and “cracked” as well as describing what to look for to help diagnose these issues.

Common Brake Drum Warranty Returns

Guidelines for Brake Drum Replacement

This document defines when to replace your brake drum:

Guidelines for Brake Drum Replacement

Removing Corrosion on Aluminum Hubs

This document shows the importance of corrosion removal from Aluminum Hubs before installing brake drums.

Corrosion on Aluminum Hubs

ON-SITE TRAINING. Ask your Webb supplier about on-site training utilizing the Webb Wheel “hands-on” Brake Drum Installation Stand. It’s a great way to help you sharpen your team’s skills as you learn how to cut maintenance costs and get the most out of your brakes.
