

FOR IMMEDIATE RELEASE

**Webb Vortex Unlimited® Brake Drum Featuring  
Cool Running Technology (CRT)™  
Receives HDT Top 20 Product Award**

CULLMAN, ALABAMA -- (March 5, 2015) On February 17, Webb Wheel was presented with one of Heavy Duty Trucking's 2015 Top 20 Product Awards for the Webb Vortex Unlimited® Brake Drum featuring Cool Running Technology (CRT)™. The Top 20 list includes products introduced in 2014 and chosen by HDT editorial staff based on level of innovation, if it addresses significant industry issues or concerns, and its potential to improve a trucking operation's bottom line.

Johnathon Capps, Vice President of Engineering, in accepting this award commented "We're particularly pleased that HDT has recognized the Webb Vortex Unlimited® Brake Drum featuring CRT™ for this prestigious product award. The brake drum was developed to offer trucking fleets better performance while at the same time reducing their costs. It's nice to know that industry professionals like the people at HDT recognized those benefits."

The Webb Vortex Unlimited® patented design features external cooling ribs that conduct heat away from brakes; and with CRT™ vents for superior heat transfer efficiency, they are the ultimate low-temperature, long-life brake drums for commercial vehicles. Webb Vortex Unlimited® brake drums also include patentpending wear indicators that further reduce costs by taking the guess work out of repairs, saving labor time and money, and maximizing brake drum life. Manufactured in the U.S., Webb Vortex Unlimited® drums featuring CRT vents, are available for most popular axle applications.
