

# WEBB ULTRA GRIP™

High performance heavy-duty calipers, carriers and assemblies  
From the brand you know and trust!

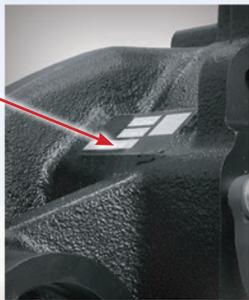

## Proven performance

Webb calipers are manufactured in a IATF16949 certified facility to ensure exceptional quality throughout the production process. The calipers are tested and assigned a unique serial number with full traceability to ensure proper functionality.

*The End of Line Test station ensures correct performance of every caliper we produce.*

*All information generated by our End of Line Test station is recorded and traceable via the ID serial number etched into every Webb caliper.*

# WEBB AIR DISC BRAKE CALIPER ADVANTAGES

Twin return springs with a unique actuation block helps eliminate caliper or lever binding.

Durable ductile iron housing with special formulation provides increased strength and durability under punishing conditions.

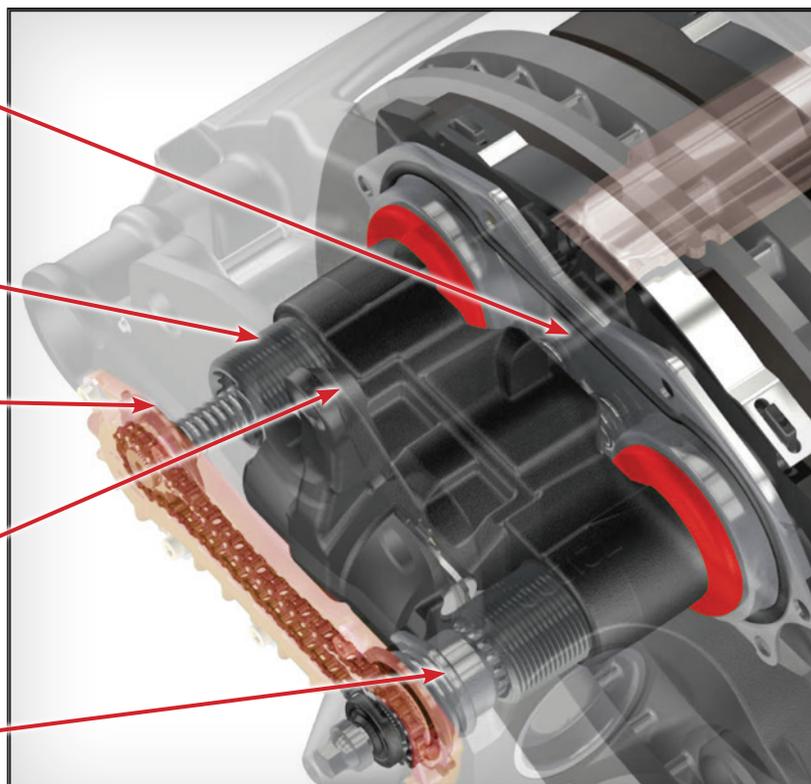

Improved sealing gives better protection against water ingress providing longer product life.

Lever profile precision machined to ensure correct brake performance.

Adjustment mechanism, unique to Webb ADB, improves efficiency and helps prevent over-adjustment to reduce pad and rotor wear.

*Webb calipers are built tough and backed with confidence!*
