

EXPERIENCE the advantage of improved performance from your Anti-Skid Braking System by using our hubs with direct machined ABS teeth.

Hubs with Direct Machined ABS Teeth

- ✓ Savings over hubs using separate ABS rings
- ✓ Less run-out on ABS tooth face than with separate ABS rings
- ✓ Signal output of machined ABS teeth meets industry standards.
- ✓ Complies with SAE J1730.
- ✓ Teeth are in same location as hubs with separate ABS rings
- ✓ Totally interchangeable with ABS ring type hubs
- ✓ Patent Number 5,739,684

vs. Hubs with ABS Tone Rings

Possibility of misalignment of ABS rings due to:

- ✓ Mis-installation of ring
- ✓ Mis-handling
- ✓ Alignment damage while installing the hub assembly on the axle
