

TECHNICAL SERVICE BULLETIN # 10-001

02/16/2010

RECOMMENDED APPLICATIONS FOR WEBB BRAKE DRUM 76864

The 76864 brake drum should only be used for standard duty, van tractor trailer or flatbed combinations. Standard duty cycle is considered typical line haul, over the road applications. This drum is qualified up to 23,000 GAWR, standard duty cycle only. Duty cycle is independent of GAWR.

This drum is not recommended for liquid and dry bulk tankers, dump truck, dump trailers, refuse applications, or similar applications.

For heavy duty cycle applications (applications that are subjected to a higher frequency of mechanical and/or thermal cycling compared to standard duty) use Webb P/N 66884 for 16.5 x 7 brake size.

For additional questions and application support, please contact Webb's Technical Support Team.
